कार्यालय नगर पालिका परिषद, शामली

(जनपद-शामली)

पत्रांक २१२८

दिनांक: १६/३/२०१८

प्रमाण पत्र

प्रमाणित किया जाता है कि इस निकाय के सभी वार्डों से विभिन्न संसाधनों के माध्यम से १०० प्रतिशत कूड़ा एकत्रित कर भैसवाल रोड स्थित कूड़ा प्लांट में निस्तारण हेतु भेजा जाता है।

अधिशाली अधिकारी

नगर पालिका परिषद शामली

ROAD MAP FOR SOLID WASTE MANAGEMENT

Segregation

WASTE CHARACTERIZATION

- Waste sampling and quantities – assessment
- Composition and characterisation of waste

COLLECTION OF PRIMARY & SECONDARY DATA

- Waste collection at source and segregation practices
- Waste segregation rates
- Current segregation effort

SOCIAL SURVEY

- Community awareness, concerns and participation in waste management initiatives.

Collection

COLLECTION OF PRIMARY & SECONDARY DATA

- Waste generation & collection rates
- Current waste collection mechanism including route plans
- Collection of waste based on its type
- Infrastructure available for waste collection
- Schedule of waste collection
- Extent of coverage of all categories of waste generators
- Financial sustainability
- Role of NGOs and rag pickers if any.

Transportation

COLLECTION OF PRIMARY & SECONDARY DATA

- Current waste transportation facilities for primary and secondary collection
- Mode and route (Route maps) of transfer of MSW to the disposal facility and concerns.
- Authorities responsible for waste transportation
- Scoping for potential transportation routes

ASSESSMENT OF VARIOUS OPTIONS

- Current practice of waste transportation including aspects of infrastructure (vehicles & equipment's), manpower and finance.
- Required transportation facilities - number of vehicles, capacities of vehicles, transfer stations
- Assessment of potential waste transfer routes
- Assessment of impacts of waste transportation on potential routes

Processing

COLLECTION OF PRIMARY & SECONDARY DATA

- Current waste processing facilities in vogue in the ULB
- Authorities responsible for waste processing

ASSESSMENT OF

- Current practice of waste processing facilities including aspects of infrastructure, manpower and finance.
- Assessment of potential waste processing facilities
- Selection of most feasible processing facilities based on socio-economic factors.
- Required disposal facilities based on waste quantities / volumes, sources and characteristics
- Land availability for MSWM facility

ACTIVITY PERFORMED

ROADMAP

ROAD MAP FOR WASTE SEGREGATION

- Active participation of all the stakeholders for segregation of waste.
- Legal enforcement by the local body for handling and management of MSW
- 100% segregation at source – households, commercial, market and institutional areas.
- Segregation of dry (biodegradable & combustibles) and wet waste (biodegradable) at source by the generators – 2-Bins
- Segregation of waste (recyclables and combustibles) during collection /in the vehicle by the waste collectors – Containers, mechanical equipment's, etc.
- Segregation of waste at transfer stations (recyclables / combustibles / inert) – magnetic separators, screens, sorting equipment's, trommels, etc.
- Segregation of waste at storage areas in waste management facility (recyclables, combustibles, organics, inert, others) – magnetic separators, screens, sorting equipment's, trommels, etc.
- Rag pickers – segregating, sorting and collection of recyclables/recoverable materials from secondary collection points, transit points and roads.
- CBOs/NGOs/SHGs – to extend support to Nagar Palika/Panchayat authorities in community awareness programs and interaction programs on source segregation and its importance to reduce impact on community health and environment.

ROAD MAP FOR WASTE COLLECTION

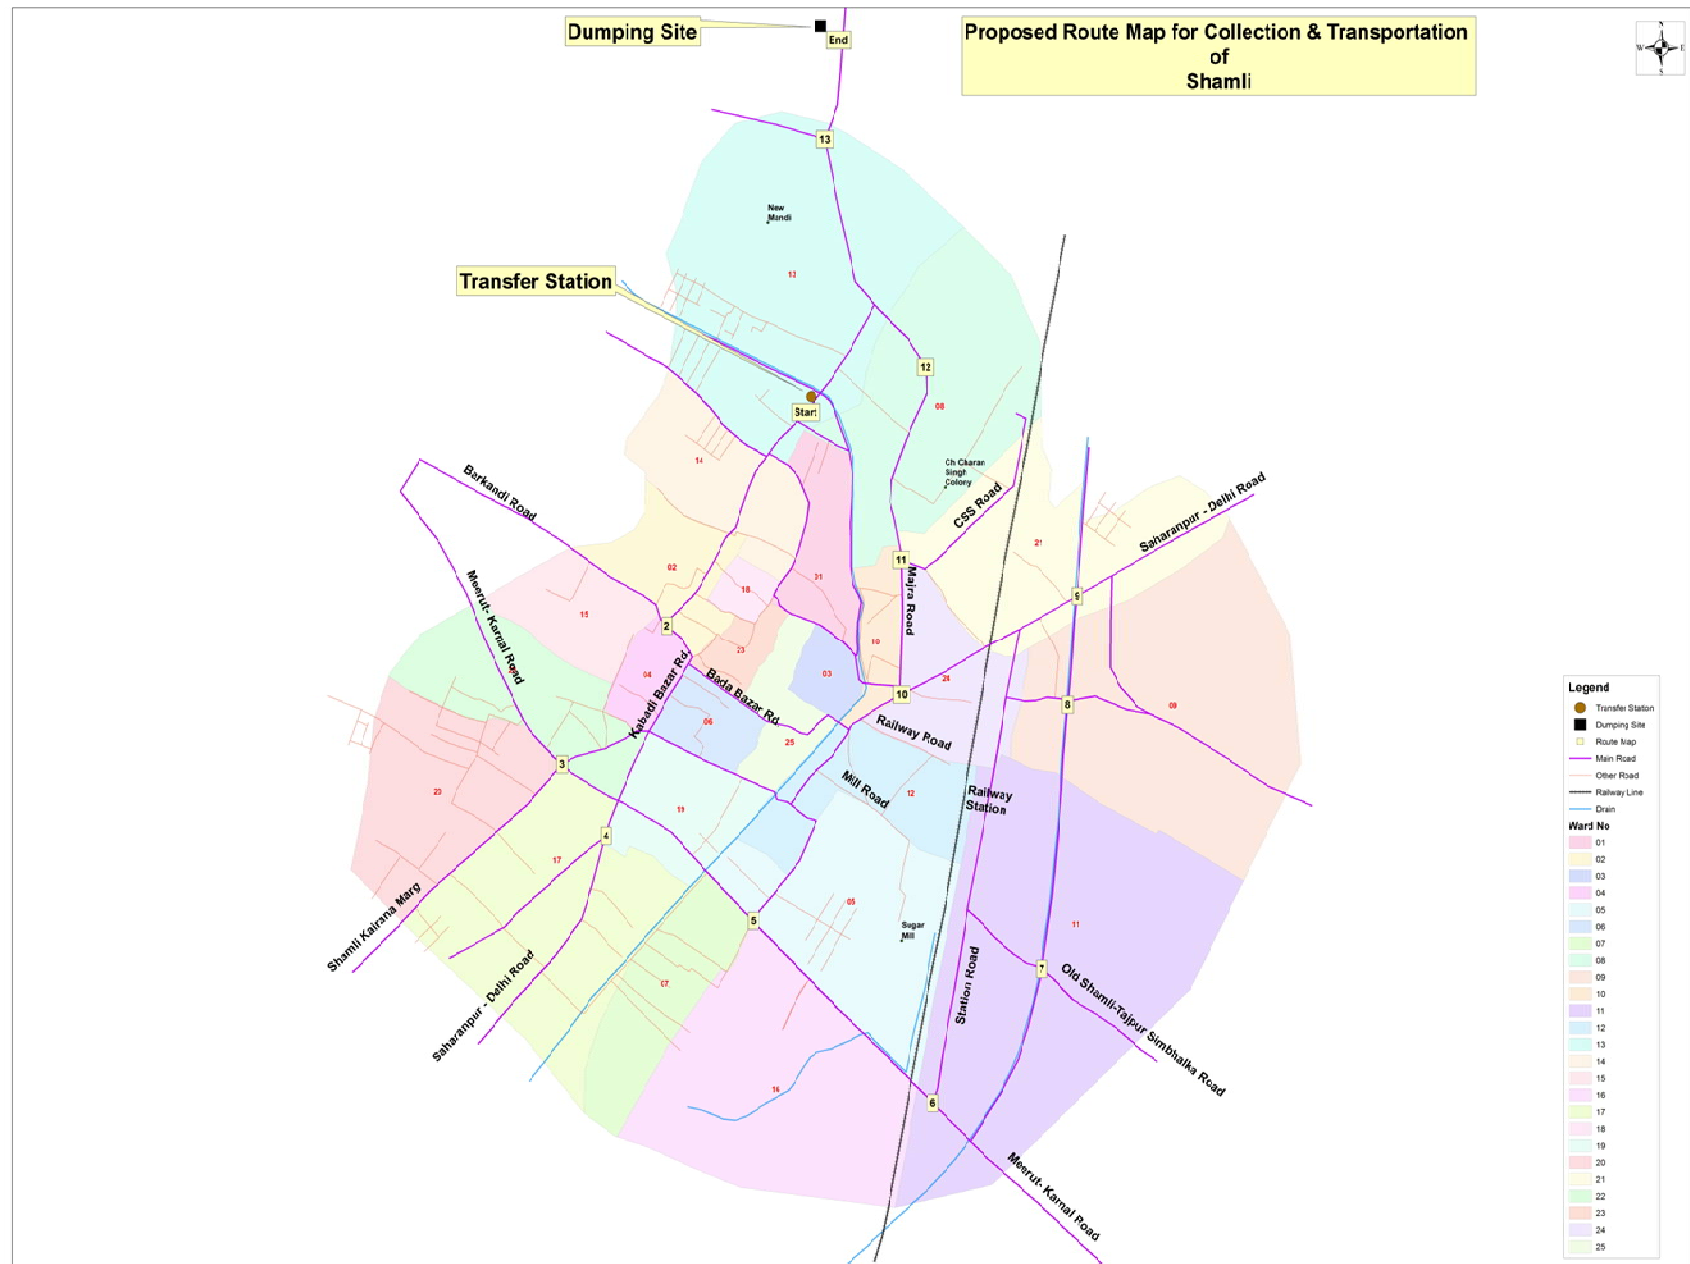

- Waste collection routes plans to be in place for efficient door-to-door collection.
- Ensuring 100% door-to-door collection from households, commercial and market (vegetable & slaughter house if any) areas for potential cost effective treatment of waste.
- Enhancing the existing collection system for collection of segregated waste from the source of generators at regular timings
- Selection of right kind of containers (bins), vehicles based on the type of waste, accessibility and space available in residential and commercial areas for primary collection
- Collection of waste from drain cleaning and street sweeping shall be done separately since it contains significant amount of toxic substances.
- Sanitary workers collecting waste shall wear PPE (gloves, shoes, nose masks and clothes covering whole body)
- Collection of waste from source to be taken up by Nagar Palika/Panchayat workers or private parties
- Opportunities for public-private partnership
- NGOs involvement for primary and secondary collection
- To ensure construction & demolition waste, biomedical waste and industrial waste are collected separately and sent for disposal as per prescribed rules without mixing with municipal solid waste.
- Elimination of open dump areas

ROAD MAP FOR WASTE TRANSPORTATION

- Operational improvements of existing waste collection vehicles (tricycles, auto tipper, tractors, tipper trucks, dumper placers etc.) with tipping, hydraulic loading/ unloading arrangements.
- Best possible transportation route based on proximity to waste processing facility, traffic volume, socio-economic issues shall be made minimizing the number of trips and optimizing the cost of transportation
- Transportation to private parties on PPP/BOO basis
- Workshop or AMC facilities for repair and maintenance of equipment's and vehicles shall be in place.
- Setting up of waste transfer stations make solid waste collection (unloading / transferring waste from smaller vehicles to larger vehicles, while removing recoverable, compacting, etc.) more efficient and reduce overall transportation costs, air emissions, energy use, truck traffic, and road wear and tear.

ROAD MAP FOR WASTE PROCESSING FACILITY

- To avoid crude dumping and adopt scientific dumping
 - Evaluating various strategies for waste processing facilities such as composting, recycling, preparation of RDF, waste to energy, bio-methanation, bio-mining (for old dump) and zero landfilling based on population projections, infrastructure, financial, technical, social and manpower requirements and best fit to the local conditions.
 - Specific timelines to achieve the best suited mode/s of processing facilities with detailed financial requirements.
- Land Requirements:
- Waste composition and characterization analysis
 - Assessment of potential economic benefits (land cost, sale of screened waste material, reducing etc.)
 - Assessment of cost for excavation, screening, transportation, equipment's, etc.

Scientific Disposal of Waste
